All information contained in this data sheet is of course open to modifications and adaptations based on location. We recommend you to contact us, to find common ground.

- **Installation :**
 - Sound equipment must be adapted to the venue, installed and adjusted prior to the arrival of the band
 - The musicians need 30 minutes minimum for the installation and sound check.
- **Wedges :**
 - 4 identical wedges
- **Stage:**
 - A single electric 16A circuit breaker protected, distributed as on the stage plan
 - Think about electrical transformers to allow 3 of 230V 50Hz for our French material
 - We need 8 still mineral water (500ml) and 4 clean hand towels for stage
 - **The drummer does not play on a drums riser** because of a bad stability, but **we need a quality carpet**
- **JackDupon :**
 - All the instruments will be supplied by the band
 - Thomas : Complete drum set. **We need micros and stands for the over heads.**
 - Greg and Fil : 2 guitar amps, **please provide micros and micro stands.**
 - Arnaud : 1 bass amp XLR direct.
 - **Provide flights or solid tables to raise the bass amp and Greg's guitar amp**
- **Vocals**
 - 4 vocals, we bring our micros, The drummer uses his own micro stand
 - **Provide 3 big stands for 2 guitar vocals and bass vocals.**
- **Provide a secure location to store the backline**
